

Town Administrator Report, October 25, 2021

- Waiting for Mediation with USDA. We heard from the mediator on 10/14/2021. We should hear back soon when we can have the meeting. We gave them 3 dates: November 9, all day; November 10 in the afternoon or November 12 all day. They said we should plan for about a 3 hour meeting that may be continued to another day. Usually does not go past 2 meeting. Planning board has their first public hearing tonight for the Mill Greenery. They have submitted a comprehensive application and it looks promising.
- Town Hall heat is fixed. Unfortunately, ARPA money cannot be used. We will need to find the funds elsewhere. The total is \$8,760.00
- We had a meeting with the Municipal Finance Oversight Board to borrow the \$1.8 million due to Eagle Hill School by 10/28. We were unanimously approved, and should have the funds within the next few business days. As you know, a municipality should not be borrowing from private entities so I am very pleased to have that burden released.
- Closing up the Green Community Grant due by the end of the month
- Working with the finance team to figure out the process and get the sewer bills sent out
- Closing out the FEMA reimbursement that was never completed. We should be getting reimbursed for about \$22,000.00
- CARES funding ends at the end of the month. After Board's tablets and a laptop for me, there will be approximately \$5,000.00
- We will be sending out the ABCC forms for renewals this week to be filled out and sent back and in front of the Board for the first December meeting
